

CPSC 526 Assignment 5

Firewall Simulator

Geordie Tait T02
10013837

How to compile

```
gcc -o fw a5.c
```

How to run

```
./fw <config file path>
```

where `config file path` is the path to a text file containing a list of properly-formed firewall rules.

The program will read lines from standard input, compare them against the list of specified rules, and print the result to standard output.
